

DOMESTIC DENTAL IMPLANT LIVE PATIENT PROGRAM

Dear Doctor,

I hope this email finds you well. Below is a summary, which covers most questions regarding our Domestic Dental Implant International Live Patient Program.

PROGRAM OVERVIEW

This 2-day program is specifically designed to teach dental practitioners how to successfully approach and treat a wide range of dental implant cases over their own live patients. You will place multiple dental implants under our faculty supervision and perform the dental implant procedure(s) of your choice. ITC Seminars offers a high tech dental surgical facility where participants will receive personalized one-on-one training by using the latest CBCT Technology and 3D imaging software to aid them in the treatment planning and surgical procedures. This program is funded by ITC CARES, a 501(c)(3) tax-exempt nonprofit organization. All costs associated with participation in this program are tax deductible donations that are directly used to fund this program.

UPON COMPLETION, YOU WILL BE ABLE TO:

- Provide diagnosis, prognosis, and properly sequenced comprehensive treatment plans.
- Utilize CBCT technology and 3D imaging for the development of an appropriate dental implant treatment plan.
- Apply the recommended guidelines for a safe and appropriate dental implant placement.
- Perform basic, intermediate and advanced surgical implant placements with maximum confidence and competency.
- Perform comprehensive examinations, collect clinical data, and document the patient's dental and medical condition.

WHY ITC SEMINARS?

- We teach only inside Universities and Approved Dental Facilities.
- Our patients are guaranteed to be 100% restored.
- Our teaching ratio is 1:1 or 1:2 for optimum learning & dedication.
- ITC Programs meet CE requirements by the ADA (CERP Certified), AGD (PACE Certified), Dental Board of California, and Dental Board of Florida.
- We ensure scientific integrity and are free of commercial bias.

PACKAGE INCLUDES:

- Unlimited implant supply
- Dedicated dental assistants
- Fully equipped dental stations

- Incision and Flap Design
- Step by Step Implant Placements
- Extractions
- Socket Preservation
- Immediate Implant placement
- Growth factors (PRP/PRF/IPRF-sticky bone) preparation techniques
- Suturing Techniques
- Bone Grafting

MAXIMIZE YOUR EDUCATION

ITC Seminars' Domestic Live Patient Programs are customized and tailored to meet the educational needs, goals, and interests of each individual doctor. When a practitioner is interested in learning an advanced dental implant surgical procedure, first they need to have the candidate(s) from their practice, and then contact ITC Seminars to schedule a meeting with our faculty to discuss the dental implant case to be approached.

Once our faculty reviews the case(s) and approves the procedure(s), the practitioner just needs to show up at the predefined date and time along with the patient(s); ITC Seminars will provide the training, facility, faculty, equipment, and all necessary supplies.

WHAT TO EXPECT ON THIS SEMINAR?

Doctors will perform dental implant placements, related surgeries, and bone grafting procedures under our faculty supervision. You will encounter various kinds of dental cases and surgical situations. Therefore, the number of implants you will place will depend on your skills and the cases you choose to approach. Nevertheless, Doctors are allowed to treat between 1-4 patients during the Live Patient Program.

On the morning before starting live surgeries, we have a short lecture and a meeting to review the treatment plan for the patients that you will be treating that day.

FACULTY

You will have the advantage of being trained by a faculty that has overseen over 25,000 dental implant procedures (oral/maxillofacial surgeons and Implant Specialists). Our faculty has been involved in dental humanitarian missions for more than 15 years. In this program you will be instructed by faculty from the US, Brazil and UK. Please click [HERE](#) to learn more about our Faculty.

SCHEDULE

The program is 2 full days in Newport Beach, California (Friday-Saturday). The first day consists of Lectures and Hands-On-Workshops on suturing techniques and dental implant training on models. The second day of the course is dedicated to Live Patient Surgery.

WHAT WE WILL NEED FROM YOU:

- Copy of your California Dental License
- Malpractice Insurance
- CV or Resume
- Approved patient(s) X-Rays and medical history/alerts
- Fill out the Course Registration Form
Complete the online surgical survey to determine your surgical experience and skills ([Surgical Experience Survey](#))
- Bring your personal Loupes

Please do not hesitate to contact me. I will be glad to answer all of your questions.

I look forward to speaking with you.

Best Regards,

Alex Lopez
