

DOMESTIC DENTAL IMPLANT LIVE PATIENT PROGRAM

PROGRAM OVERVIEW

Whether you are new to implant surgery or looking to enhance your expertise, this comprehensive, 3-day live patient course is designed to provide participants with a complete mastery of dental implant surgery, covering everything from foundational skills to advanced techniques. Throughout the course, participants will be guided by a team of implant experts, including oral and maxillofacial surgeons and implant specialists who have over 3 decades of dental implant surgical experience. From digital scanning to CAD/CAM design, participants will work with cutting-edge technology and receive training the digital workflow for dental implant restoration.

Participants will learn how to utilize CBCT imaging for precise implant planning and predictability. Participants will perform both basic and advanced dental implant surgeries, as well as bone grafting techniques, including the use of PRF/iPRF (Platelet-Rich Fibrin) to create "sticky bone" for optimal graft integration. Under the continuous supervision of expert instructors, participants will conduct all live patient surgeries themselves, building the confidence to implement these procedures in their own practices. By the end of the course, participants will be fully equipped to offer dental implant surgeries to their patients with precision, predictability, and success.

This program is funded by ITC CARES, a 501(c)(3) tax-exempt nonprofit organization. All costs associated with participation in this program are tax deductible donations that are directly used to fund this program.

UPON COMPLETION, YOU WILL BE ABLE TO:

- Provide diagnosis, prognosis, and properly sequenced comprehensive treatment plans.
- Apply the recommended guidelines for a safe and appropriate dental implant placement.
- Perform Basic to Advanced Dental Implant Surgeries: Under the guidance of expert faculty, participants will progress from fundamental implant placement techniques to more advanced surgeries to elevate confidence and skills in complication management and enable the confidence to take on implant cases in a variety of clinical situations.
- Perform comprehensive examinations, collect clinical data, and document the patient's dental and medical condition.

- Bone Grafting and PRF Techniques: Learn essential bone grafting techniques, including the use of PRF/iPRF (Platelet-Rich Fibrin) to enhance healing and stability, and create "sticky bone" for optimal graft integration.
- Master the Digital Workflow: Learn the complete digital workflow for dental implant restoration.
- Utilize CBCT Imaging: Understand and apply CBCT (Cone Beam Computed Tomography) imaging for implant predictability and planning. This course emphasizes how CBCT technology enhances accuracy in implant placement, helping to avoid complications and ensure long-term success for patients.

WHY ITC SEMINARS?

- We are the only Dental CE provider in the world to have academic exchange partnerships with International Universities. All of ITC Seminars' Live Patient Programs are taught and led inside Universities.
- Thanks to our joint partnership with International Universities, all course participants receive a provisional temporary dental license to be able to treat patients internationally and for protection from any liability. We are the only Dental CE Provider to provide course participants with legal authorization and a temporary license to practice dentistry internationally.
- Our International Live Patient Programs are limited to only 6 participants for maximum training, supervision, guidance, and course participation.
- Our teaching ratio is 1:2 for optimum learning & dedication.
- Our patients are guaranteed to be 100% restored. All course participants will receive a follow up report that includes images of all the cases they treated during the course fully restored.
- This Live Patient Program is worth 24 CE hours and is certified by the ADA (CERP Certified), AGD (PACE certified), Dental Board of California, and Dental Board of Florida.
- All participants will be evaluated by our faculty throughout the entirety of the program to highlight and reinforce growth edges and ensure maximum confidence and competence in dental implant treatment planning and implant surgery upon graduating from the program.
- We ensure scientific integrity and are free of commercial bias.
- All dental implant materials and components fulfill all international, local, state, and government requirements to be used on live patients.

PACKAGE INCLUDES:

- | | |
|----------------------------------|--------------------------|
| • Implant supply | • Bone grafting material |
| • Patients | • Surgical instruments |
| • Dedicated dental assistants | • Surgical Kits |
| • Fully equipped dental stations | • Digital X-Rays |
| • Sterile setup and protocol | • 24 CE Credits |
| • Piezo Handpiece | |

SURGERIES PROMOTED

The following are the procedures you will perform in our Dental Implant Live Program:

- Incision and Flap Design
- Step by Step Implant Placements
- Extractions with immediate implant placement
- Socket Preservation
- Immediate Implant placement
- Growth factors (PRP/PRF/IPRF-sticky bone) preparation techniques
- Suturing Techniques
- Bone Grafting

WHAT TO EXPECT ON THIS PROGRAM?

You will encounter various kinds of dental implant cases and surgical procedures. All patients are preselected, screened, and evaluated in advance for each course participant. Our Dental Implant Live Patient Program is designed to help you master the essential foundations of Dental implant surgery, from incision and flap design to implant placement and suturing. With full hands-on training, you will be guided by our expert faculty through each critical step, ensuring you develop a comprehensive understanding of the skills required for successful implant restorations. Personalized instruction and ongoing evaluations by our expert instructors will ensure that you receive focused guidance on the areas where you need the most improvement.

The number and type of procedures you perform during the course will depend on your skill level, surgical experience, and the time it takes to complete each procedure. Our faculty will continuously assess your performance, adjusting the learning experience to maximize your progress and help you build the confidence to perform dental implant surgeries effectively.

Every morning, on the days of live patient surgery, we have a short lecture and a meeting with all the doctors to review the treatment plan and medical history for the patients that you will be treating that day. In that moment, with the X-Rays in hand, we evaluate the cases and discuss the best treatment plan and approach for each patient.

FACULTY

You will have the advantage of being trained by oral/maxillofacial surgeons and Implant Specialist. Our faculty has been involved in dental humanitarian missions, academic exchanges, and specialized in the field of oral implantology for over 3 decades. Please click [HERE](#) to learn more about our Faculty.

SCHEDULE

The program is 3 full days. The first day will consist of Lectures and hands on workshops on suturing techniques and dental implant placement on models. The following 2 days are dedicated to Live Patient Surgery.

TRAINING FACILITY

ITC Dental, Newport Beach, CA
5010 Campus Drive, Suite 110
Newport Beach, CA 92660

HOW TO REGISTER

Please provide the following items via email to itgolive@gmail.com or fax to (949) 460-0042.

1. Copy or resume/cv
2. Copy/picture of your Dental School Diploma/Certificate
3. Copy/picture of valid California dental license
4. Copy/picture of valid CPR certification
5. Complete the online surgical survey via the following link:
<https://forms.gle/LXfYfAGdoRg2cngh6>
6. Copy of completed course registration forms
7. Copy of signature on last page of ITC Seminars Handbook

These documents must be completed and submitted to ITC Seminars to secure your seat in the Live Patient Program.
